**PRESS RELEASE**

**UPDATE ON THE ABCOURT-BARVUE AND ELDER PROJECTS**

MONT-ST-HILAIRE, Quebec, Canada, November 13, 2006

**Abcourt Mines Inc.** is pleased to report assay results from the current 40-hole exploration drill program at its Elder Gold Mine property located in Rouyn-Noranda, Quebec. The intention of the drill program is to increase the known gold resources at the Elder Mine.

Hera are the results obtained to-date:

<u>Hole number</u>	<u>Depth</u>		<u>Length</u> <u>(m)</u>	<u>Au</u> <u>g / t</u>
	<u>From (m)</u>	<u>To (m)</u>		
06 – 07	93.50	95.00	1.50	3.56
	210.50	212.00	1.50	4.11
06 – 11	185.78	187.06	1.28	4.19
06 – 12	137.94	139.84	1.90	9.49
	188.13	190.22	2.09	40.12
	193.86	195.00	1.14	5.92
06 – 05	124.70	133.80	9.10	3.87
	inc.	124.70	2.00	4.42
	inc.	129.22	2.33	3.74
	inc.	132.55	1.25	10.23

The assays were done at Techni-Lab S.G.B. Abitibi Inc., a qualified laboratory. The drilling was done under the supervision of a qualified person, Mr. Renaud Hinse, P. Eng., president of the Company.

All holes were drilled vertically in a new area at the east end of the mine and the values obtained represent additions to the known 43-101 resources previously reported. The values intersected in holes 06-12 with 2.09 meters assaying 40.12 g / t gold and in hole 06-05 with a 9.10-meter wide zone of mineralization assaying 3.87 g / t gold are exceptional. Additional assays are pending.

In the meantime, the Abcourt-Barvue feasibility study is progressing satisfactorily. As mentioned previously, the milling process will include the cyanidation of the ore to recover most of the silver and gold, a zinc flotation to recover zinc and some silver and finally the flotation of pyrite to produce non-acid generating tailings. As this process is new, our consultants have decided to proceed with additional tests to validate the process as a final step before incorporating the results into the feasibility study.

The excavation of the former Barvue Mines Limited mill foundation is almost completed.

Abcourt Mines Inc. is an exploration and development company with strategically located properties in Northwestern Quebec. The Abcourt-Barvue project with 43-101 silver-zinc resources and the Elder mine with 43-101 gold resources are both past producers. Abcourt is now focused

on bringing these two projects back in production. To know more about Abcourt, please consult our web site [www.abcourt.com](http://www.abcourt.com) and Sedar [www.sedar.com](http://www.sedar.com) .

The Abcourt shares are trading on the TSX Venture Stock Exchange under the symbol ABI.V and at Frankfurt and Berlin in Germany.
