ABCOURT INTERSECTS A VERY HIGH GRADE SILVER ZONE ON THE ABCOURT-BARVUE PROPERTY

Mont-St-Hilaire, Québec, Canada, February 15, 2012

Mr. Renaud Hinse, President and C.E.O. of Abcourt Mines Inc. (TSX-V: ABI, Berlin: AML-BE and Frankfurt Stock Exchanges: AML-FF) (the “Company”), is pleased to announce that hole AB11-67 on section 5040 E, in the western part of the Abcourt-Barvue ore body has intersected a high grade silver zone as indicated in the following results:

From 240.0 to 244.70 meters, the average grade is 1,386.16 grams of silver per tonne and 5.57% zinc over 4.7 meters. This includes a section of 1.30 meter from 243.40 to 244.70 meters in the hole with a grade of 4,696.00 grams of silver and 11.75% zinc. True width is about 80% of core length. This intersection was cut at a depth of 225 meters from surface.

The drilling program on Abcourt-Barvue is designed to augment and to upgrade existing 43-101 all categories resources and reserves. The property is located 60 km north of Val d’Or, Québec.

31.1 grams = 1 ounce

All assays were done by Techni-Lab S.G.B. Abitibi Inc., an approved laboratory.

“Our drilling program continues to give excellent results in the main zone of mineralization. We are getting good grades and good widths. The above results with those reported previously are adding to our reserves and resources.” stated Mr Hinse.

About Abcourt Mines Inc.

Abcourt Mines Inc. is an exploration and development company with strategically located properties in northwestern Quebec, Canada. The Elder Mine with 43-101 gold resources, the Abcourt-Barvue Project with 43-101 silver-zinc ore reserves and resources and the Aldermac property with historical copper-zinc resources are all former producers. Abcourt is now focused on bringing the Elder and Abcourt-Barvue projects back into production with Elder as the first priority. At the same time the company is working on other projects (Aldermac, Vezza, Jonpol and Vendome) to increase its mineral resources inventory. A 43-101 resource calculation was completed in July, 2009, for the Elder Mine. A positive 43-101 feasibility study was completed by GENIVAR in 2007 on the Abcourt-Barvue Project. In addition, mill equipment was purchased. To know more about Abcourt, please visit our web site at www.abcourt.com and SEDAR.

FORWARD-LOOKING STATEMENTS: *Certain of the information contained in this news release may contain "forward-looking information". Forward-looking information and statements may include, among others, statements regarding the future plans, costs, objectives or performance of Abcourt Mines Inc. (the "**Company**"), or the assumptions underlying any of the foregoing. In this news release, words such as "may", "would", "could", "will", "likely", "believe", "expect", "anticipate", "intend", "plan", "estimate" and similar words and the negative form thereof are used to identify forward-looking statements. Forward-looking statements should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether, or the times at or by which, such future performance will be achieved. Forward-looking statements and information are based on information available at the time and/or management's good-faith belief with respect to future events and are subject to known or unknown risks, uncertainties, assumptions and other unpredictable factors, many of which are beyond the Company's control. These risks, uncertainties and assumptions include, but are not limited to, those described under "Risk Factors" in the Company's amended and restated annual information form dated November 26, 2010 and could cause actual events or results to differ materially from those projected in any forward-looking statements. The Company does not intend, nor does the Company undertake any obligation, to update or revise any forward-looking information or statements contained in this news release to reflect subsequent information, events or circumstances or otherwise, except if required by applicable laws.*
